

Pseudocode & Flowchart

Pseudocode

It Blueprint of code, omits the syntax, make human Readable Language or also can be said as English

Example:-

Q) Add Two Number a,b

Soln) Read a,b (Take Input From a, b)

Let sum = a + b (Make a variable and adding a and b)

Print Sum (Printing the output)

Flowchart

→ It is Diagrammatic Representation of Code

→ To understand the code in diagram form

→ Shapes Which are used:-

◆ Terminator:-It used to start or end the flowchart

◆ Input/Output Block :- It used to show a what is inputted and print

◆ Process Block :- It used to show process like initializing, Operation, etc

◆ Decision Block :- It used for this or that, Used mostly for if-else or loop

◆ Arrow :- To connect the block of flowchart

→ Example:-

Q) Draw a flowchart to input two numbers from the user and display the largest of two numbers

Soln)
